1. Welcome to the PhD programme in Management

Welcome to the Department of Management. We are very happy to have you on board, and we hope that this info folder can help you find your way through the complex journey of taking a PhD.

In this folder, we try to address some of the most typical questions that a new PhD student might ask as to administrative and/or practical problems and issues related to being a PhD student and employee at the department.

Please provide us with feedback in case you lack some specific information, or you think something should be addressed in greater depth. Any input from your side is highly appreciated!

2. The PhD degree programme

- Below, you can find information about the following issues:
- PhD guidelines, rules and regulations
- Supervision
- PhD planner
- PhD budget
- Formal obligations during your PhD
- Designing your PhD dissertation
- Career planning

2.1. *PhD guidelines, rules and regulations*

[The Ministerial PhD Order](#) is the main set of rules that governs your PhD study programme. It forms the foundation for the [Aarhus BSS Graduate School, Rules and Regulations for the PhD degree programme](#) (hereafter called “BSS PhD Rules and Regulations”) and this again sets the frame for the rules and regulations set up at the departmental level. So, whenever the programme chair or the head of the BSS Graduate School, who is also the vice-dean for Research and Talent Development at Aarhus BSS, takes a decision in relation to your individual study programme, these rules and regulations come into play and are the foundation for any decision made. Therefore, we highly encourage you to read these documents closely at the beginning of your PhD studies so that you are well informed about your rights and obligations.

In terms of attendance during your PhD studies, please note that the BSS Graduate School is part of Aarhus University, which is a campus-based university. This means that as a general rule, PhD students are required to attend their department in person (see also: [BSS PhD Rules and Regulations](#), item 6.1.)

2.2. *Supervision*

Supervision is core for moving towards the ultimate goal of earning a PhD degree, and for this purpose, you have been assigned a main and a secondary supervisor. As a default, you should in close collaboration with your supervisors initiate supervision meetings and engage in a mutual dialogue about project progression as well as fulfillment of formal PhD obligations. The main supervisor has the overall supervision responsibility for the entire

PhD programme towards the BSS Graduate School and the PhD student and must offer thorough supervision on the dissertation as well as other components of the PhD programme, including the ECTS requirements and the relevance of courses and activities, teaching duties and the stay abroad. The main supervisor is also expected to discuss career plans with the PhD student during the PhD degree programme. The co-supervisor is expected primarily to provide scientific advice and supervision within the field of the PhD student. Further information can be found in item 10.3 of the [BSS PhD Rules and Regulations](#).

Supervision agreement

The [Supervision agreement](#) is not a contract but a conversation guide to achieve good alignment of mutual expectations. The document aims to help supervisors and PhD students to align expectations in relation to the supervision process. In the BSS PhD Rules and Regulations (item 10.3) it says: “The exact distribution of supervision duties between the supervisors must be arranged in each specific case and stated in writing in the supervision agreement as part of the PhD plan”. We recommend that the document is used not only during the upstart but during the entire PhD process in order to ensure that expectations are continuously aligned and, if necessary, adjusted in response to major changes in the PhD project and/or supervision process.

Procedure for change of supervisor

Adjustments during the PhD process are to be expected, and one may in rare cases experience the need to change supervisor (see also [BSS PhD Rules and Regulations](#), item 10.4.). Change of supervisor(s) is generally made on the basis of an agreement between the PhD student, the former supervisor(s), the programme chair, the head of department, and the head of the BSS Graduate School as well as consent from the new supervisor(s) that (s)he will take on the task. If agreement cannot be reached as to change of supervisor, the head of the BSS Graduate School will decide what to do after consultation with the programme chair and the head of department.

If you find it difficult to discuss your wish for change of supervisor directly with your supervisor, please always approach the head of your section, the programme chair or the head of department, and always ask explicitly for confidentiality.

2.3. PhD planner

The most essential formal project management tool throughout your PhD study programme is the PhD planner (<https://medarbejdere.au.dk/en/faculties/business-and-social-sciences/employment-and-career/employment-as-a-phd-student/phd-planner-login>). Here you list your plans and progress regarding your PhD project and your formal obligations (course work, teaching, stay abroad). The first time you are asked to do this is 3 months after enrolment, then again after 6 months after enrolment and thereafter every 6 months. The plan will be reviewed and approved first by your main supervisor, then by the programme chair, and finally by the head of the BSS Graduate School.

A good thing to know is that you have no access to your PhD planner when it is under review. It is important that you provide detailed information on every aspect of your PhD studies (project progression and formal obligations) in every PhD Planner round, as your report cannot be approved otherwise.

2.4. *PhD budget*

Being a PhD student at the Department of Management means that you have 30,000 DKK to spend during your PhD study for e.g.:

- PhD courses
- conferences
- travels
- student assistant working hours
- books
- software
- data collection
- etc.

Shortly after enrolment, new PhD students will be asked to provide a budget for their entire PhD period. The budget is made in collaboration with your supervisor(s). The budget must be finished no later than 3 months after enrolment, and should be sent for approval to Annette. It will be controlled throughout your PhD study. The budget can of course change during the enrolment period to reflect needed changes.

3. Formal obligations during your PhD

- In the following, you can read more about the formal obligations during your PhD studies:
- PhD courses
- Conferences
- Teaching
- Change of research environment/stay abroad
- PhD presentations

3.1. *PhD courses*

According to the rules and regulations at BSS, courses on scientific theory or methods within the field of management count as PhD courses. PhD students have to take 30 ECTS of course work during the 3-year process. A minimum of 15 ECTS has to be taken from courses provided by BSS (incl. the Department of Management), the rest can be taken elsewhere. The Department of Management offers currently 3 mandatory PhD courses (see table below) of 15 ECTS in total). If/when you choose to take external courses (meaning all courses outside Aarhus BSS), you must submit an application for pre-approval of each course prior to your participation. This application must be submitted to the Head of the MGMT PhD programme at least 14 days prior to the first course date. Further information can be found [here](#).

If you seek and obtain any kind of dispensation as to your course work, you must always include information on the dispensation in your PhD Planner, so that all details can be found and accessed in the PhD planner at all times.

Overviews on available PhD-courses at AU and elsewhere can be found in the appendix (1) at the end of the info folder.

Q&A PhD Courses

Question	Answer
How many ECTS am I required to take?	30 ECTS. You can take more if you and your supervisor find it appropriate and your PhD budget allows it.
How many ECTS am I required to take from PhD courses at the department?	<p>There are three compulsory PhD courses at the department (15 ECTS in total) which all PhD students have to take:</p> <ul style="list-style-type: none"> • Advanced Qualitative Research Methods (5 ECTS) (Module A mandatory, free choice between module B-D) • Applied Quantitative Methods in Management Research (5 ECTS) • The Research Process and the Role of Theory in Business Research (5 ECTS) <p>On top of that there is one compulsory PhD course on BSS level “Responsible Conduct of Research” (RCR) that gives you credit for additional 2 ECTS.</p>

3.2. Conferences

To participate in and present your work at conferences is a huge potential for learning and meeting other researchers in your field, and PhD students are encouraged to present at conferences. All PhD students must present at least one contribution at an international conference.

Q&A Conferences

Question	Answer
How do I apply for MGMT funding?	The procedure for how to apply for MGMT funding is described in detail here
Can I get ECTS for conference presentations?	Yes, 1 ECTS per presentation. The PhD student is only awarded ECTS credits for participation in international conferences and workshops if he/she contributes to the presentation. To apply for ECTS, please use the form also used for pre-approval of external PhD courses.
Is it a requirement that I have to present at a conference during my PhD?	Yes, all PhD students must present at least one contribution at an international conference (see item 7.5 in the BSS PhD Rules and Regulations).

3.3. Teaching

In accordance with the [BSS PhD Rules and Regulations](#), all PhD students must during

their PhD studies get the opportunity to acquire teaching skills. For that purpose, the department has defined a specific amount of teaching hours that you should fulfill during your PhD studies. For details on teaching and workload, please refer to this [page](#).

How to find teaching hours?

Before you make any plans for your teaching, discuss your plans for teaching with your supervisors and with Christian Waldstrøm, the vice head of department for teaching and/or Anne Nisker Toppenberg. We advise you to do so very early on in your PhD studies.

If you have any questions regarding teaching, please contact Christian Waldstrøm and/or Anne Nisker Toppenberg who can also help you by pairing you up with the relevant teaching coordinators.

Registering your teaching hours

At the department, all teaching hours for all staff are registered in Excelsior. Please refer to the guidelines [here](#) (see under “Registering teaching activities”). For PhD students, Anne Nisker Toppenberg is responsible for registering teaching hours in Excelsior, so please keep her posted on any teaching activities, you are involved in.

Q&A Teaching

Question	Answer
The norm system - How many hours do I have to teach at the department?	MGMT norm system
Who do I contact for help and information on teaching?	Christian Waldstrøm and Anne Nisker Toppenberg
Where can I get training in how to teach? Do such courses count in the 30 ECTS?	PhD students at the BSS Graduate School of Business and Social Sciences can participate in pedagogic courses offered by the Centre for Educational Development (CED). The course “ Teaching technique for PhD students ” is not mandatory but all PhD students are highly encouraged to take it. No ECTS are given for the course, but 40 hours are deducted from your teaching obligation upon completion of the course. Please see the range of courses offered by CED here None of the CED courses can count as part of the 30 mandatory ECTS (please see “PhD Courses” above).

3.4. Change of research environment/stay abroad

In accordance with the [BSS PhD Rules and Regulations](#) item 7.2., the main supervisor needs to ensure that a long-term research stay is arranged in close collaboration with the PhD student as part of the PhD student’s study programme. The stay abroad usually lies

during the 3rd and the 5th semester of the enrolment period.

To enable this, the department supports your change of environment/stay abroad with a grant for up to a max. of 30,000 DKK (for stays of 3 months consecutively or longer). The department grant is granted regardless of external funding. This implies that there is no requirement that external funding has been/will be sought to get access to this funding.

In addition to this, the department may grant you a deficit guarantee of up to max. 30,000. The application procedures are described in detail [here](#) under “How to apply for co-financing of stays abroad”.

The stay abroad must be registered in the PhD planner, and any kind of deviation (e.g. length, change of environment in Denmark - as opposed to abroad - etc.) must prior to the stay be approved by the PhD programme chair and then be finally approved by the Head of the Aarhus BSS Graduate School.

Q&A Change of research environment/stay abroad

Question	Answer
How long time do I have to go abroad?	You are required to go as a minimum 3 months consecutively, maximum 12 months.
Does it count for any teaching hours?	No.
Where can I get funding?	Apply for an internal grant of 30,000 DKK at the department. See under “How to apply for co-financing of stays abroad”. Apply for external grants. Some are found here . Please also see list here under “How to apply for co-financing of stays abroad”. It is always a good idea to ask your fellow PhDs as to where they have applied.
Who can help me with applying for external funding?	The Research Support and Project Management Office

3.5. PhD presentations

In accordance with the [BSS PhD Rules and Regulations](#) item 7.4., all PhD students have to present their work regularly, at MGMT that is after the first, second and third year of enrolment. The first and second year presentations are organized by the PhD programme at the department. Here, the PhD students present their projects to demonstrate progress and quality of their research project and their ability to present research. The PhD students present in front of their supervisors (at least one of them has to be present), and two appointed discussants from the MGMT PhD committee, and the department faculty is also invited. The two discussants are members of the PhD programme committee at the department. The presentations usually take place in August and January.

The 3rd year presentation is organized by your supervisors and usually takes place within the last three months prior to the submission of your dissertation. See the department's [PhD presentation guidelines](#) for further details.

4. Designing your PhD dissertation

- In general

- The final dissertation
- Assessment of your dissertation

4.1. In general

The [BSS PhD Rules and Regulations](#) state that PhD students at the BSS Graduate School have to write either a book (a monograph) or a collection of articles (an anthology) as their dissertation. For an anthology, the number of papers at the department are typically 3-4 plus a summary (in Danish “sammenfatning” or “kappe”). The choice of writing either a monograph or an anthology should be taken by the PhD student together with the supervisors as early as possible in the PhD process.

Below, you can find some general advice about what to consider, when designing an anthology in order to live up to the above requirements. Please note that there might be differences in regard to research disciplines and fields. Therefore, you should always make these decisions in close collaboration with your supervisors, who are most experienced in your specific field of study.

In order to fulfill the requirement in the BSS rules and regulations that a dissertation has to “include entirely independent contributions of major scientific importance” (see item 11.1 in the [BSS PhD Rules and Regulations](#)) it is strongly suggested that at least one paper is done by the PhD student her- or himself alone, thus a single-authored paper. The remaining papers can be done in collaboration with others (supervisors, and/or national and international research colleagues). In case of co-authorships, the PhD student has to provide [co-author statements](#) when submitting the dissertation, where the individual contributions have to be specified. In case no single authored paper is part of the dissertation, the PhD student has here the opportunity to clearly indicate that s/he has main responsibility for those parts of the paper that secure an independent and original contribution. If this is not the case, it might be worthwhile considering an additional paper as part of the anthology dissertation, in order to provide evidence for your research potential. Another way clearly to indicate your own role in the paper is the order of authors, where the main author is normally positioned first. Here, it is suggested that the PhD student on top of being single author on one paper, in case of co-authored papers is first author on one paper, and in case of no single-authored paper, is first author on at least two papers.

In regard to the summary, it is stated in the BSS PhD rules and regulations (item 11.1) that “[t]he summary must (possibly briefly) account for the relation between the publications and how they contribute to the overall PhD project”. This indicates that you here should sketch out and elaborate upon your overall research project, motivation, research question, scientific positioning, theoretical background, research design, overall findings/contributions, and how your individual papers contribute to this. Depending on your specific field of research there might be differences in terms of how long this section might be, but most dissertations at the Department of Management spend about 20-40 pages on this part.

The above recommendations are intended to help you design your dissertation in a way that ensures that you fulfill the requirements set up by the BSS Graduate School. Please note, that the final decision of whether your dissertation can pass or not, is taken by the PhD [assessment committee](#) that after submission of your dissertation evaluates your work independently based on the BSS rules and regulations.

4.2. *The final dissertation*

In accordance with the [BSS PhD Rules and Regulations](#) (see item 11), the dissertation can be in either Danish or English, and abstracts in Danish as well as in English have to be enclosed. You hand in your dissertation by sending a pdf file to the [PhD administration](#) at the department. Please use the official dissertation cover page and please include co-author statements. Templates for dissertation cover page (English/Danish) and template for co-author statements are [here](#).

Please beware that the list of PhD activities is extracted automatically from the PhD Planner to form an appendix to your PhD certificate – therefore always make sure that the PhD Planner is updated. If it is not updated, the assessment process cannot be initiated and thus will be delayed.

4.3. *Assessment of your PhD dissertation*

Regarding the evaluation of your dissertation, the rules state that the assessment committee has two months – from the time you hand in – to assess your dissertation. The rules also say, that the defence should then take place within one month after the assessment of the assessment committee, unless you are asked to resubmit your dissertation. However, July is always considered as holiday time and will thus not be part of the deadline.

If you would like to have a look at the PhD dissertations already conferred at Aarhus BSS, you will find them [here](#).

4.4. *Publication bonus*

As a PhD student, you may be entitled for two different kinds of publication bonus. The Graduate School may after a successful PhD defence and upon application award a publication bonus of 10,000 DKK for publications as part of your PhD dissertation that are on level 2 of the [BFI list](#). In line with the [general departmental publication bonus regulations](#), the department can grant 30,000 DKK for publications that are rated 4 or 4* on the departmental journal list ([Academic Journal Guide](#)).

5. Career planning

It is very important that all PhD students continuously focus on/are aware of career development throughout their PhD enrolment period. Therefore, it is highly recommended to get acquainted with the [Career services for PhDs and junior researchers](#) already from the start. The various services include

- (individual) counselling e.g. on the career development process, career planning tools, good advice on career planning, career paths, AU career destinations
- seminars and workshops e.g. on the writing of CVs and strategic career planning events
- an AU mentor PhD & JR programme
- job application toolkits, for applying for either a job in Industry or in Academia

Career planning should be an integrated part of the supervision process throughout

the entire enrolment period.

5.1. Continue your academic career with a post-doc

Post-docs are generally externally financed, and you can apply for your own funding – which might be a good idea if you wish to stay in academia – because showing that you are able to attract external funding is well perceived. There are a few foundations that have yearly (or at other frequencies) calls for grant applications. Applying for such funds requires that you have an original and quite precise idea for a research project.

5.2. Continue your academic career with an assistant professorship

Sometimes assistant professorships are financed by the department – so to have a talk with the head of department or the heads of sections would be advisable if you are interested in staying at the department. Also regularly check international jobsites e.g. AcademicKeys or akadeus.com

5.3. Continue your career outside academia

As already mentioned above, the AU career centre offers career services for PhD students at the end of their PhD study to help them formulate their competencies in a way to make it relevant and interesting for both public and private employers. Look at their [website](#) for further detail and contact them.

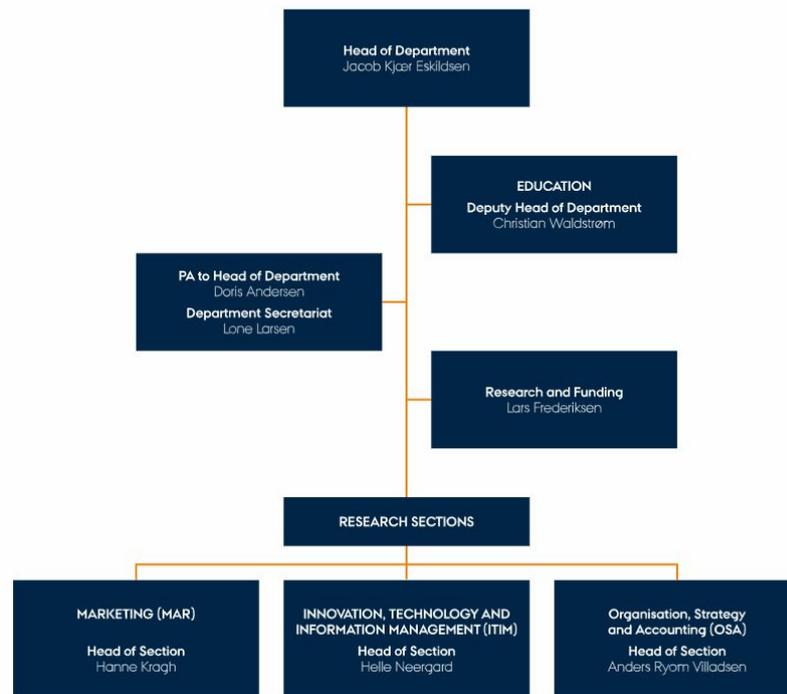

6. Department matters

- In the following, you can find more information on:
- Organization
- Practical information
- Brown Bag Meetings
- Mentor scheme
- Useful information for non-Danish colleagues
- Leave of absence
- Illness and sick leave
- Psychological counselling
- Fora and committees

6.1. Organization

The Department of Management is part of Aarhus BSS, one of the five faculties at Aarhus University. The formal organization of the department is as follows:

Organisation chart

Who to turn to re.:

- *Administrative PhD issues at the department level* – Annette Hein Bengtson. Also please cc Annette on all emails to the programme chair. Annette's door is always open.
- *Formal applications* e.g. applications for pre-approval of PhD courses, any applications for deviations from the stipulated PhD programme, sickness due to stress – the programme chair Birte Asmuß. Birte is the formal link between the department and the BSS Graduate School. Birte's door is always open.
- *Personal issues*. Depending on which of the three sections you belong to, you can always approach your section head on personal issues. The names of the section heads appear from the organization chart above.
- *SSD* – [Staff Development Dialogue](#) – The OSA deputy head of section, Ingo Kleindienst and the ITIM deputy head of section, Franziska Günzel-Jensen, conduct the SSDs with PhD students affiliated to their sections. The MAR section does not have a deputy head of section, therefore the MAR head of section, Hanne Kragh, conducts the SSDs with the PhD students affiliated with the MAR section.
- *Teaching* - Christian Waldstrøm and/or Anne Nisker Toppenberg
- *PURE/Excelsior* – Anne Nisker Toppenberg
- Purchasing rules, administrative systems etc. – Lone Malmros

Shortly after your start, you will receive invitations for short meetings from Christian Waldstrøm, Anne Nisker Toppenberg and Lone Malmros/Lone Larsen to get you introduced to teaching, PURE/Excelsior, and the purchasing rules and the administrative systems.

6.2. Practical information

On the department's webpage, you will find a page called [Practical information](#) which is a rich source of useful information about a wide range of practical subjects relevant to all employees at the department.

6.3. Brown bag meetings

The PhD students at the department regularly arrange so-called Brown Bag Meetings (meetings during lunchtime where you bring your own lunch) where they meet to discuss practical issues and/or to present research to each other. The head of department, the programme chair and others may be invited to join upon invitation from the PhD students if there are special issues they can inform about.

6.4. Mentor scheme

The department has a [mentor scheme](#) to improve new employees' integration into the department's routines and activities. Upon enrolment a mentor is allocated to you.

6.5. Useful information for non-Danish colleagues

At the International Staff Office [homepage](#) you will find a Helpdesk for International Staff (for PhD students and researchers) with information on a lot of relevant information e.g.

- Pre-arrival in Denmark
- On arrival
- Living in Denmark

6.6. Leave of absence

PhD students enrolled in the three-year scheme have all the same rights as other employees regarding leave in connection with childbirth, pregnancy and illness. For more information on the rules on leave of absence (including information on the rules for PhD students enrolled in the four or five-year scheme) please refer to item 6.4 in the [BSS PhD Rules and Regulations](#) and on the BSS Graduate School's [homepage](#) on the subject.

Illness and sick leave

It is important that you notify

- Lone Malmros (if your first name begins with A-K)
- Lisbeth Widahl (if your first name begins with L-Å)

on the first day of absence and when you are back to work. Also notify Lone or Lisbeth if the illness is expected to last for more than 3 weeks. For further information, please look [here](#).

In case of long-term illness, you can apply for an extension of your enrolment period for a corresponding period – but only when you are fully recovered and are back to work. In order to do so, please write an application for extension, have it signed by your supervisor and then forward it to the programme chair. The final decision lies with the BSS Graduate School. For further information, please look under item 6.4 in the [BSS PhD Rules and Regulations](#).

Parental leave

Different rules apply regarding leave owing to childbirth and pregnancy parental leave depending on whether you are enrolled in the 3-year scheme or the 4- or 5-year scheme. For details, please look [here](#). How to find the right person to turn to? Please look [here](#) under “Department of Management”.

6.7. *Psychological counselling*

If you are experiencing difficulties at work, e.g. stress, cooperation issues or similar matters that influence your work, AU offers free psychological counselling. Look [here](#) for further details.

6.8. *Fora and committees*

There are a number of relevant fora and committees for you as a PhD student and as an employee at the Department of Management:

- [PhD forum](#) – consists of representatives from the group of MGMT PhD students and the PhD field committee with the purpose to assure quality in all aspects of the PhD programme.
- [Mentor Scheme](#) – the purpose is to improve the work experience of new PhD students and other faculty and improve their integration into the department’s routines and activities
- [The Local Liason Committee](#) – lays down the framework for cooperation between management and employees
- [The local Occupational Health and Safety Committee](#) – the objective is to ensure a healthy and secure working environment
- [The Aarhus University PhD Association](#) AUPA works politically and strategically to improve conditions for PhDs across the five faculties at Aarhus University
- [The Aarhus BSS Staff Association](#) – Professional, social and cultural events for all BSS staff across departments and other units at BSS
- [The Aarhus University Fitness Centre](#) – has its own fitness room and offers a wide range of fitness classes

7. AU library

The [AU Library](#) offers a great number of services and facilities. For an overview, please have a look [here](#). The AU Library offers help with/information on e.g.:

- Publishing
- Copyright
- PURE
- Bibliometrics
- Open Access
- ORCID iD
- Plagiarize
- Systematic literature searches
- Reference management, EndNote
- Systematic reviews
